## Extensive industrial and logistics consulting services

Before you hire a consultant, you want to know who you will engage with. The first session with RMC is free of charge. During the intake session we will thoroughly discuss the organizations issues and what role we can play to provide improvements.

### PROJECTPLAN

After the intake session we will write a project plan, including the proposed approach and planning. You can then assess whether your company's situation is properly reviewed and that the proposed approach address your needs.

You will also receive a quotation which the costs and terms. The process thus far is free and without obligation.

Immediately after the start of the project a project team will be created. This ensures support and commitment within your organization and also results in workable solutions.

Our method is characterized by a combination of rigorous analysis followed by direct action, improvement and aftercare.

### BUSINESS PROCESS MANAGEMENT

RMC focuses on process, project management, change management and related systems. We specialize in companies in manufacturing, logistics, non-profit and local, regional and central government.

Process Management has become an indispensable part of business today. It allows you to improve your competitiveness not only to be more efficient, but also to be more effective in selling your products and / or services to your customers by focusing on your business processes.

RMC helps you to map, configure, implement, review and improve your business process. We also help you to define KPI's which enable you to monitor your company's progress in process improvement. We find the right answers to your questions and provide you with the implementation of a successful change within your company.

### Model

### What have we done?

- Divestment of a product line to new owner.
- Conversion of R & D to production organization of a bio technology company.
